Dear Residents,

Below is the extract of the Electricity Supply Code'2005 (Page no.-86) of U.P. Electricity regulatory Commission:

(Ref. Clause 4.9)

Guidelines for Determination of Load in case of Multi-storied Building/Colonies

- (i) For domestic – 500 watt per 10 sq. meters of the constructed area or requisitioned load, whichever is higher.
- (ii) For commercial – 1500 watt per 10 sq. meters of the constructed area or requisitioned load, whichever is higher.
- (iii) For lift, water lifting pump, streetlight if any, corridor / campus lighting and other common facilities, actual load shall be calculated.
- (iv) The constructed area calculated for (i) and (ii) above shall exclude the constructed area arrived at in (iii).
- (v) Following diversity factors shall be considered for determining the maximum demand :-
 - a) Non Domestic Area: 0.75
 - b) Domestic Area: 0.5

We would be distributing the load as per the bye laws as below:
